24 February 2026

### Army Legal Services Transformation Efforts

#### JAGC Teammates:

The Army is in an era of significant and dynamic transformation. As I have previously messaged, we will be the JAG Corps the Army needs.

As a component of a larger Department of the Army modernization directive, The Office of the Judge Advocate General is collaboratively working with the Office of the General Counsel to examine how we deliver legal services. The General Counsel and I established the Army's Legal Services Transformation Team (LST2), co-led by BG Natalie Lewellen and Mr. Bayne Johnston. The team will explore how we can better capitalize on our collective strengths and synchronize our legal support to military operations.

This is a priority effort for our Corps and LST2 has my complete support. I know you will be responsive to any requests from the LST2 and I encourage you to contribute your innovative ideas through your leadership.

This is our moment to build a stronger JAG Corps that is better aligned with the Army's current transformational initiatives and better capable of rapidly leveraging our expertise to support the current and future needs of our Army. This effort will forge a more capable and effective JAG Corps

This We'll Defend!
